Title Index

Anaerobic treatment of olive mill effluents in polyurethane foam bed reactors, by A. Rozzi, R. Passino, and N. Limoni . .68

Aseptic concentration of living microbial cells by crossflow filtration, by P. Mourot, M. Lafrance, and M. Oliver 3

Biodegradation of lignin from the acid hydrolysate of cornstover by selected mixture of yeasts, by Margareta Glancer and S. N. Ban 109

Biological ferrous iron oxidation in packed-bed columns with low-grade sulphide material as support, by M. J. Garcia, I. Palencia, and F. Carranza 84

Catabolite repression of cellulase production in *Aspergillus nidulans*, by P. S. Bagga, D. K. Sandhu, and S. Sharma. .41

Characterisation and treatment of dairy effluents by free and immobilised yeast, by S. S. Marwaha, J. F. Kennedy, H. K. Tewari, and A. Redhu 46

Computerized system for monitoring and control of fermentation processes, by I Havlik, L. Yerushalmi, and B. Volesky 9

Continuous production of ethanol from aspen (*Populus tremuloides* Michx.) cellulose by co-immobilised yeast and enzymes, by Shu Chen and Morris Wayman 204

Continuous recovery of silver from used X-ray films using a proteolytic enzyme, by Nobuaki Fujiwara, Takahiko Tsumiya, Tsutomu Katada, Takehi Hosobuchi, and Kazuhiko Yamamoto . . . 155

Droplet size studies of mycelial culture broths in a liquid—liquid system, by E. Caprani and L. R. Weatherley 227

Determination of vitamin C by immobilised ascorbate, by L. B. Carvalho, C. J. Lima, E. H. M. Melo, and J. F. Kennedy . . .52

Effect of hyperosmotic pressure on growth of L5178Y cells, by Jill E. Thomas and Ronnie S. Roberts 179

Enzymatic hydrolysis of raffinose and stachyose in soybean milk by α-galactosidase from germinating guar (*Cyamopsis tetragonolobus*), by B. D. Shivanna, M. Ramakrishna, and C. S. Ramadoss. . . 197

Enzymatic hydrolysis of wheat straw: studies on column reactor with enzyme recycling, by G. González, G. Caminal, C. de Mas, and J. López-Santin 62

Ethanolic fermentation of wood derived hydrolysates *Zymomonas mobilis* in a continuous dynamic imobilised biocatalyst bioreactor, by S. R. Parekh, R. S. Parekh, and M. Wayman 88

Fast and reliable organic acid determination in fermented milk using an enzyme-electrode based analyser, by Florence Sechaud, Sophie Peguin, Pierre R. Coulet, and Gilbert Bardeletti . . .33

Fermentation of D-xylose by the yeasts *Candida shehatae* and *Pichia stipitis:* prospects and problems, by B. A. Prior, S. G. Kilian, and J. C. du Preez 21

Growth of *Saccharomyces cerevisiae* in stillage from alcohol fermentation of Jerusalem artichoke, by N. Kosaric, M. I. Bottner, and R. Blaszczyk 92

Influence of pH on the kinetic and yield parameters of *Scenedesmus obliquus* heterotrophic growth, by F. Camacho Rubio, E. Martineez Sancho, S. Sánchez Villasclaras, and A. Delgado Pérez 133

Large-scale ethanol production from milo (sorghum) using *Zymomonas mobilis,* by Robyn J. Millichip and Horst W. Doelle 141

Membrane characterization using porosimetry and contact angle measurements: a comprison with experimental ultrafiltration results, by Vassilis Gekas and Wei Zhang 159

New process for L-isoleucine production, by Masato Terasawa, Norio Kakinuma, Kazumichi Shikata, and Hideaki Yukawa 60

Omega-3 fatty acids: alternative sources of production, by Wichien Yongmanitchai and Owen P. Ward 117

On-line measurement of urease activity to estimate a population of *Streptococcus thermophilus* in pure and mixed culture, by Henry E. Spinnler, Alberto Rozzi, Catherine Beal, and Georges Corrieu 187

Oxygen transfer studies in air-pulsed column bioreactor, by V.V.P.S. Murthy, K. B. Ramachandran, and T. K. Ghose. . .77

Penicillin acylase: enzyme production and its application in the manufacture of 6-APA, by J. G. Sherwale and H. Sivaraman 146

Process for large-scale recovery of intracellular yeast invertase based on heat- and pH-shift treatment, by K. Büntemeyer, K. H. Kroner, H. Hustedt, and W. -D. Deckwer 212

Production and purification process for myaxalin: a new glycopeptide having anticoagulant properties, by A. Akoum, F. Devichi, M. Kalyanpur, J. P. Neff, M. A. Vijayalakshmi, and M. Sigot. . .55

Production of 2,3 butanediol in a membrane recycle bioreactor, by N. Qureshi and M. Cheryan 172

Production of ethanol from corn using inoculum cascading of *Zymomonas mobilis*, by Monica B. Doelle, Robyn J. Millichip, and Horst W. Doelle 137

Protein enrichment of citrus wastes by solid substrate fermentation, by T. J. Barreto de Menezes, T. de J. G. Salva, V. L. Baldini, R. S. Papini, and A. M. Sales 167

Purification of thermostable alpha-amylase produced by *Bacillus licheniformis* M27 under solid-state fermentation, by M. V. Ramesh and B. K. Lonsane 176

Safety in biotechnology: the use of biosensors for the detection of hazardous biochemicals in air, by M. Behizad, R. H. Cumming, F. J. Rowell. T. T. Salusbury, and I. W. Stewart 126

Simulation of shake flask conditions in a bioreactor for the biosynthesis of cellulase and xylanase by a mixed culture of *Trichoderma reesei* D1–6 and *Aspergillus wentii* PT 2804, by Tapabrata Panda 104

Strategies for spore production by *Pencillium roquefortii* using solid state fermentation techniques, by C. Larroche and J. B. Gros . .97

Studies on co-immobilisation of amyloglucosidase and *Saccharomyces cerevisiae* for direct conversion of starch to ethanol, by N. Chithra and A. Baradarajan. 208

Studies on the effect of germination time on the malting qualities of two maize varieties, by G. N. Aniche 183

Survey of laboratory, pilot, and industrial anaerobic filter installations, by N. Bonastre and J. M. Paris 15

Two-phase dispersion process for the production of biopolymer gel beads: effect of various parameters on bead size and their distribution, by P. Audet and C. Lacroix 217

Xanthan gum precipitation using ethanol, by R. Gonzales, M. R. Johns, P. F. Greenfield, and G. W. Pace. 200
